

Welcome to Grimsholm®

Finally - the 2023-season catalogue is here including Grimsholm's biggest product-group launch ever.

Our Water & wash category contains already more than 40 articles, and more is to come. The irrigation assortment will be one of our strongest and most attractive concepts ever launched mainly because the high quality to affordable prices. The assortment will improve retail and specialty stores competitiveness.

Once again, I would like to present my great appreciation to all existing customers and partners for your efforts made so far during last season. It was a tough market situation we all needed to handle, and I am very satisfied with all your efforts. Based on your incredible achievements, Grimsholm have grown with close to 60% in turnover and are now present in more than 30 European countries.

For 2023, we have improved our IT-systems and implemented more efficient working routines especially within our supply and logistic processes. Also, with a more educated and comprehensive customer support department we will lift the entire business and give you as a customer better service and support than ever before.

Grimsholm is simply now taking a step up as one of the leading European accessory suppliers within garden and forest industry.

Secure your assortment for the upcoming year and order now!

With best wishes for great sales during 2023!

Denniz Gustafsson, CEO

NEWS

NEW MARKET LAUNCH - WATER & WASH

We announce the launch of our new Water & Wash range.

There has long been a high demand for quality irrigation accessories on the European retail market, but affordable premium products have been few. Grimsholm Lab has built a base assortment of premium products that will continue to grow in the coming years, with a focus on high-end materials and connectivity.

HOSE COUPLING

100% Compability with other brands

- Stainless steel spring
- UV protected
- Rubber grip

ON/OFF TAP ADAPTERS

- Cast aluminium
- Brass nut
- Rubber grip

WIDER RANGE OF ROBOT ACCESSORIES

For 2023 we further solidify our position as the industry leader in accessories for robot lawn mowers. In order to provide robotic lawn mowers better performance and a longer lifespan, our creative R&D section, Grimsholm Lab, has concentrated on the most popular accessories for maintenance and protection.

ROBOT MOWER FENCE

Protect an area with sturdy steel arches

COPPER OR ALUMINUM

WHAT TO CHOOSE FOR MY INSTALLATION?

The most frequently asked cable question from our customers.

TC - THE PROFESSIONAL'S CHOICE

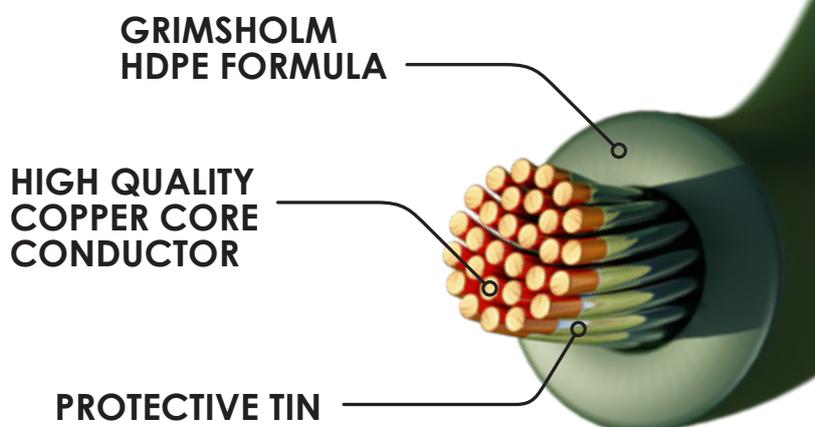

TC (Tinned Copper) is the **Premium** alternative offering many years of hassle-free robot mower installation. Forced weather tests of Grimsholm TC cable with the special composed HDPE formula with extraordinary high density have shown life span of **20+ years with a 10 year warranty** following the product.

Even during wear and tear and if the insulation gets damaged the TC cable is much more resistant for corrosion and oxidation compared with an TCCA cable.

All Grimsholm TC cables (Premium) does follow the **GB/T 4910-2009** standard with 99.97% Oxygen-free copper purity inside.

To ensure the cable's compliance with specification, we cooperate with the Research Institutes of Sweden (RISE).

TCCA - THE BUDGET CHOICE

TCCA (Tinned Copper Clad Aluminum) is the low price/budget alternative. The expected life span for a TCCA cable with LLDPE, LDPE or PE insulation which is not exposed to external wear and tear is often 2-4 years. With Grimsholm HDPE higher density insulation formula, the expected lifetime is about **4-6 years with a 3 year warranty**.

There is a tough climate in the ground and an aluminum cable is good when they are new, but sometimes problems show up after the cable has been used for a while. Especially in the cases of the insulation getting damaged due to external factors.

The conductivity in a TCCA cable is significantly lower than a TC cable with the same conductor area, therefore the TCCA cables are often made thicker to be able to carry the robot mower signal. And very often the thick TCCA cables are offered as HEAVY DUTY or PREMIUM by suppliers which makes it even more difficult for the consumer. Here, your expertise as a professional Grimsholm® retailer, being able to inform accurately and correctly makes it easier for the consumer to make a conscious choice.

The Grimsholm TCCA cables does follow the **ASTM-B566 CCA – 10A** standard with 10% Oxygen-free copper calculated by volume (appr 36% copper by weight). The **Euro Standard** and **Euro Standard Plus** cables from Grimsholm are best sellers in the low price retail stores.

FOR ROBOTIC LAWNMOWERS

Watch the Grimsholm® installation kit video at www.grimsholm.com

Give your robot the best conditions for the job

320

MEDIUM INSTALLATION KIT FOR ROBOTIC LAWNMOWERS

SUITABLE FOR 800-2,000 m²

- 200 m Signal cable (art. 135)
- 300 pcs Signal cable spikes (3 x art. 151)
- 4 pcs Joint couplings (art. 171)
- 4 pcs Connection plugs (art. 181)

330

LARGE INSTALLATION KIT FOR ROBOTIC LAWNMOWERS

SUITABLE FOR 2,000-6,000 m²

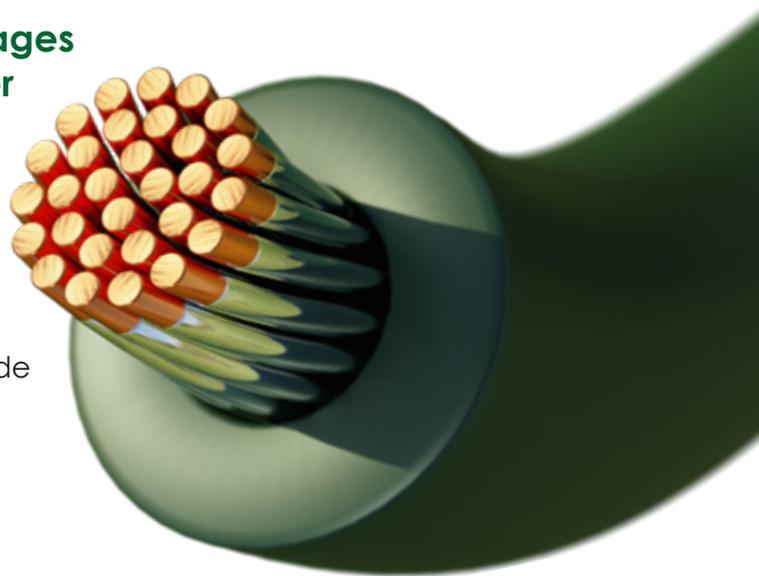

- 500 m Signal cable (art. 139)
- 700 pcs Signal cable spikes (7 x art. 151)
- 4 pcs Joint couplings (art. 171)
- 4 pcs Connection plugs (art. 181)

All of our repair and installation packages includes Grimsholm's Premium copper core cable.

Tinned copper core High quality HDPE insulation

LIGHTNING PROTECTOR

PROTECTS YOUR ROBOT MOWER FROM LIGHTNING STRIKE TRANSIENTS

The lightning protector from Grimsholm® leads the high voltage transient from lightning to a grounded point. It protects sensitive electronics in the robot mower as well as in the charging station.

LIGHTNING PROTECTOR

Reliable lightning protection

- Tested in Swedish lightning laboratory
- Large steel plate for excellent grounding
- Completely weatherproof

The lightning protection does not affect the normal functions of the charging station or lawn mower. It is activated only when the lightning can damage sensitive electronics.

The lightning protector is available in two versions:

- Single, for perimeter wire + up to 1 guides
- Double, for perimeter wire + up to 3 guides

NOTE!

This product is protecting the robot mower and charging station from being damaged by indirect lightning strikes causing transients that often are caught up by the robot mower signal cable. The product does not protect the robot mower nor the charging station from direct lightning strike hits.

ART.NO.	EAN	ARTICLE NAME	WARRANTY	RETAIL PACK
4030	7333272040300	Lightning protector for robot mower signal cable - single	3Y	5
4035	7333272040355	Lightning protector for robot mower signal cable - double	3Y	5

Folksam

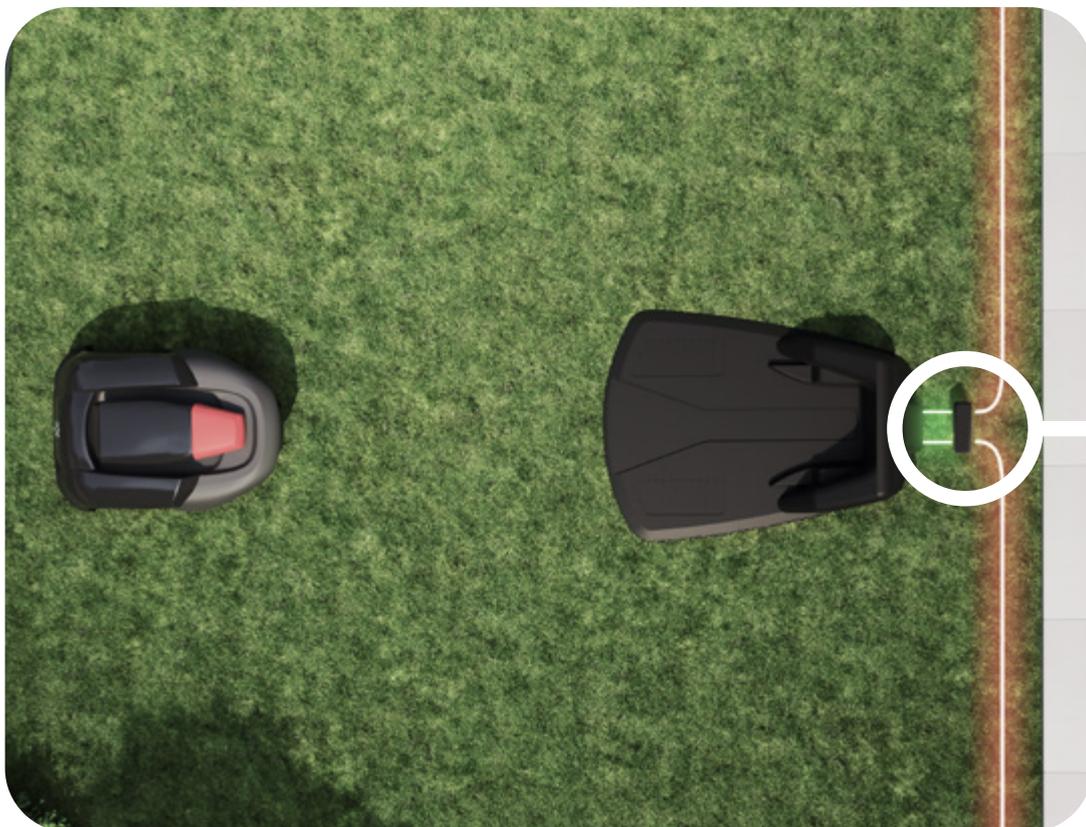

Folksam is one of the Grimsholm® retailers as well as one of the the largest insurance companies in Sweden.

“Folksam has for several years examined lightning strikes at households in Sweden and in the latest annual thunder report we clearly see a strong increase in robotic lawnmowers being affected.

In 2013, only 2.6% of the households which received lightning strikes was connected to robotic lawnmowers and in 2020 the same figure was as high as 39.3%.

The trend is very strong and soon half of all strikes will affect the robotic lawnmower. We at Folksam therefore recommend all households who have a robotic lawnmower in the garden to review both protection and insurance”

Erik Arvidsson
Damage Prevention, Housing
Folksam

100% weather-proof and inaccessible to insects that prefer to live in boxes and cavities. The cables are UV-protected to withstand the sun and all metal parts are made from weather resistant steel.

FOR THE ROBOT MOWER

161

HEAT SHRINK JOINT COUPLINGS

With Grimsholm® heat shrink joint coupling you can make **waterproof joints in your robot installation**. With solder that melts and creates a secure connection combined with double glue ring seals on each side of the connection, both good connectivity and high insulation against moisture are provided.

ART.NO.	EAN	ARTICLE NAME	WARRANTY	RETAIL PACK
161	7350076761613	Heat shrink joint coupling, 4 pcs	10Y	40
165	7350076761651	Heat shrink joint coupling, 50 pcs	10Y	1

161

HEAT SHRINK JOINT COUPLINGS LONG

With Grimsholm® heat shrink joint coupling, you can make **waterproof joints in your robot installation**. The splice coupling contains a 200mm long extension with Premium HD cable which is the highest quality level of cable from Grimsholm®.

This in combination with its waterproof properties makes the coupling both easy to use, as **it replaces a damaged part of the existing signal cable up to 200 mm long, as well as enabling a connection with minimal resistance**.

ART.NO.	EAN	ARTICLE NAME	WARRANTY	RETAIL PACK
163	7350076761651	Heat shrink joint coupling, long, 4 pcs	10Y	40

Grimsholm® couplings at www.grimsholm.com

JOINT COUPLINGS

The Grimsholm® joint coupling is the only joint coupling on the market that is exclusively designed to work optimally for robot lawn mower installations. Inserting a cable from each side of the coupling and the fact that the coupling is oblong, it is usually sufficient to use just one coupling when you splice a cable that has broken off in the ground.

ROBOT MOWER RING

DESIGN PRODUCTS MAKING GARDENING EASY

The Grimsholm® Robot Mower Ring creates an edge in level with the lawn to make it easy for the lawnmower cutting the edge of the lawn. This way, the need for edge trimming around trees and other objects is significantly reduced.

ROBOT MOWER RING

CLEAN EDGES

Easy mounting without need of tools

- High quality Swedish steel
- 10 year Warranty
- Three sizes & three colors

ZINC

Magnelis steel which provides an extraordinary corrosion protection.

CORTEN

Slow corroding steel turning into a rust patina over time.

DARK GRAPHITE

Magnelis steel which is painted dark gray.

HYBRID GRASS

GIVES THE LAWN A FIGHTING CHANCE

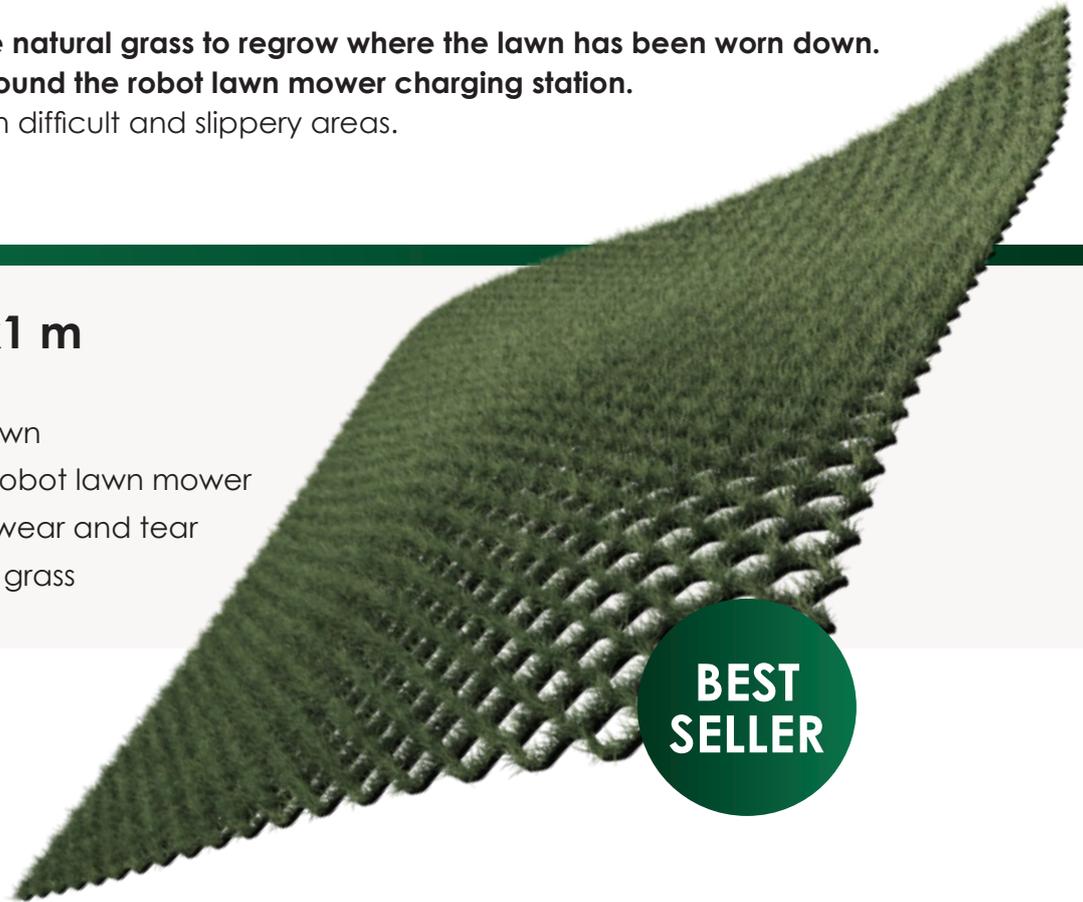

The hybrid grass allows the natural grass to regrow where the lawn has been worn down. Not least on uphill and around the robot lawn mower charging station. Get a perfect lawn even in difficult and slippery areas.

HYBRID GRASS 1x1 m

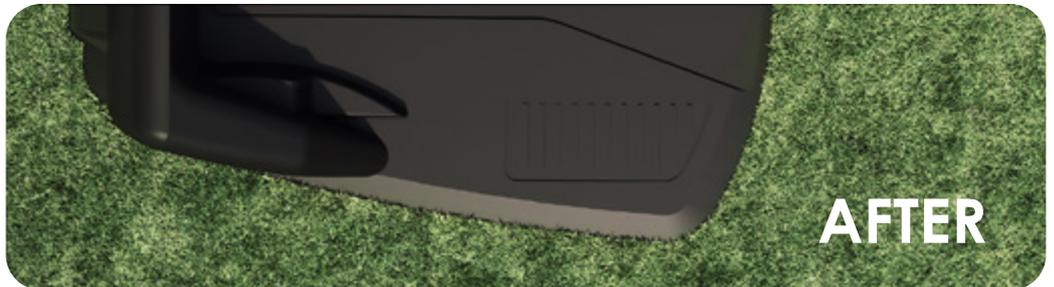

BESTSELLER 2022

Restore and protect the lawn

- Better grip for your robot lawn mower
- Protects lawn from wear and tear
- Quickly restores the grass

**BEST
SELLER**

Example use to protect the lawn around the robot mower charging station

NEW 572	7350076765727	Hybrid grass Premium, 1x25 m including fastening nails	3Y	1

HYBRID GRASS

GIVES THE LAWN A FIGHTING CHANCE

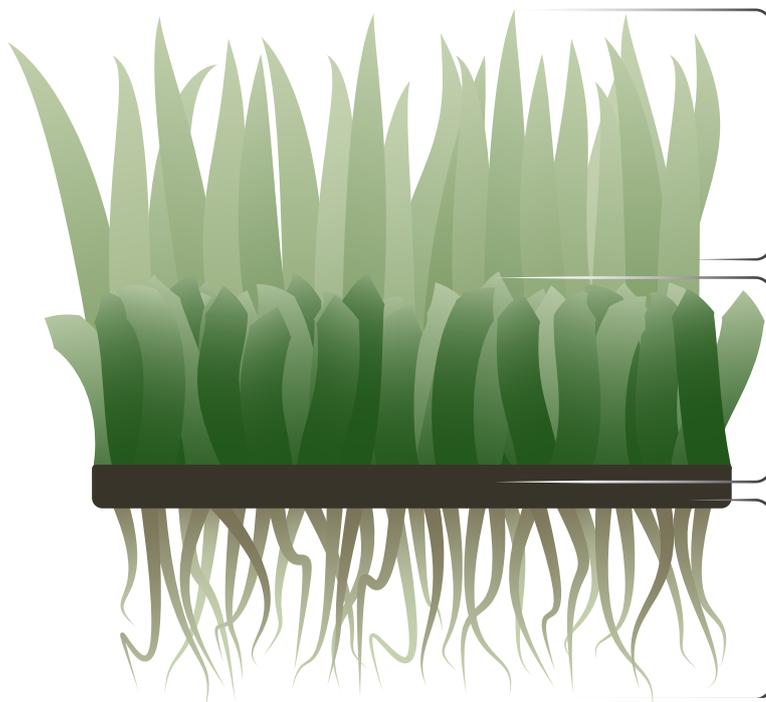

NEW

HYBRID GRASS 1x25 m

FOR BIG AREAS

Restore and protect the lawn

- Better grip for your robot lawn mower
- Protects lawn from wear and tear
- Quickly restores the grass

Natural grass

Above ground the natural grass grows in the net of artificial grass well protected from wear and tear.

Hybrid grass (artificial)

Made of recycled material.

Natural root system

By supporting loose ground, the hybrid grass product allows the regeneration process of the root system to start.

Providing a reinforcing geotextile, our Hybrid grass supports both above and below ground. With this protection the grass starts a process of regeneration. By supporting loose ground, the grass grows a healthier and a less compact deep root structure.

WATER & WASH

IN-STORE CONCEPT EXCELLENCE

BUILD THE SHOPPING EXPERIENCE WITH GRIMSHOLM

for a high quality feeling and top selling result.

- Basic assortment of the best selling irrigation articles
- Wide assortment of garden hoses - from Basic to Expert.
- Up to life-time warranty on selected articles.
- On-screen shopping experience available for upsales!

When building the new Grimsholm® Water & Wash assortment the focus has been on the overall concept feeling as well as the small details in each product. The best materials have been chosen, UV stabilizers have been optimized and the steel details are mostly stainless.

The user experience excellence is well thought out and reflects the same sense of quality that is expected from all Grimsholm® branded products.

SMART HOME & GARDEN

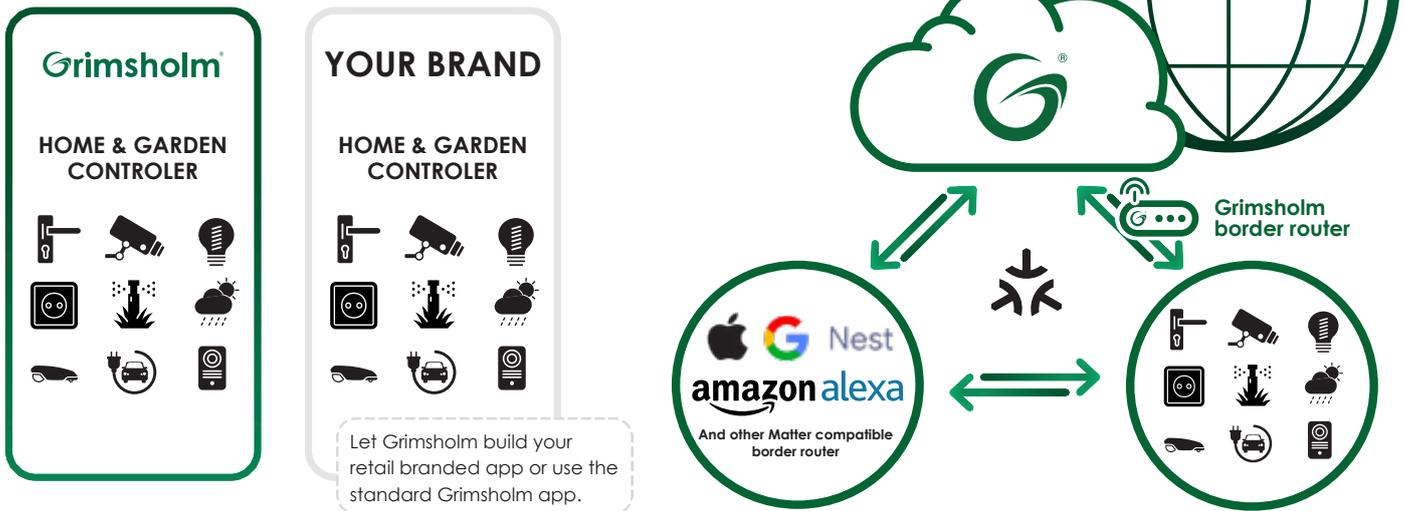

MATTER IS THE NEW STANDARD

Several of the world's largest brands within IoT for the Smart Home has since several years been working on the new Matter standard was released late 2022. This new standard will be a complete game changer for the IoT industry as it will be much easier for the end consumer to buy IoT from different brands using them together in the same echo system.

NOW - LET'S CONNECT THE GARDEN AS WELL!

Early 2022 Grimsholm announced its participation in the Connective Standard Alliance with the ambition to be the leader of connecting the Smart Home with the Smart Garden.

"Grimsholm is a great addition to the Alliance. Now, Matter's value can be extended, using the mesh network, from the home throughout the yard and garden. And as a fast-growing European garden retail brand, we are excited to have Grimsholm's unique perspectives on Matter's use in yet another new environment."

Chris LaPre, Head of Technology for Connectivity Standards Alliance.

GRIMSHOLM LABORATORIES

Securing the highest available quality in garden and forestry products

Our team of dedicated product developers works closely with our in-house laboratory as well as external laboratories and organisations to ensure that the products keeps the highest available quality.

Our internal laboratory is equipped with the latest and most advanced equipment for testing areas that our products are in need of such as UV testing, material strength, material composition

and weather force testing to withstand the European climate from northern Sweden to the warmer climate in southern Europe.

Except our internal laboratory we do work close with external laboratories and organisation for material and standard development and compliance to ensure we are making following standards and maximizing the quality of the products we puts on the market.

Partners for product development

The Grimsholm administration and sales site in Falkenberg, Sweden seen from the railway station.

TRIMMER LINE & BRUSH CUTTERS

TRIMMER LINE

HIGH QUALITY, CLEAN CUTS

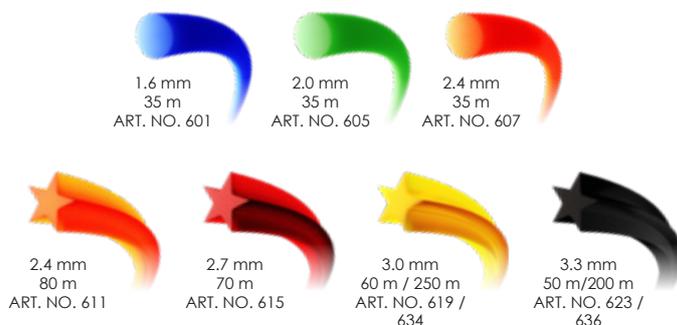

Grimsholm® trimmer line is made of high quality European nylon with optimized properties for durability combined with quiet operation. To make it easy for the consumer the trimmer line is color coded according to the international standard.

BRUSH CUTTER BLADES

Designed for coarse, woody vegetation

- Balanced for high RPM
- Fits most existing brush cutters
- High precision grinding

The brush cutter blades from Grimsholm is available in two versions:

2.0 mm blades suitable for all users as it does not need to be set up or sharpened as often due to its thickness. Accordingly, maintenance on this blade is minimal.

1.6 mm blades are praised by professional users who work all day long with their brush cutter. A lightweight blade with excellent balance and durability.

FUEL & LUBRICATION

GRIMSHOLM PREMIUM ALKYLATE

IS A SUCCESS STORY SINCE THE START

Today, Grimsholm Alkylate is one of the most known Alkylate products in the Nordic and central Europe areas. The high and consistent quality of the fuel has also made it very popular for racing and the Swedish champion Norton Andreasson is both training and competing with Grimsholm fuel.

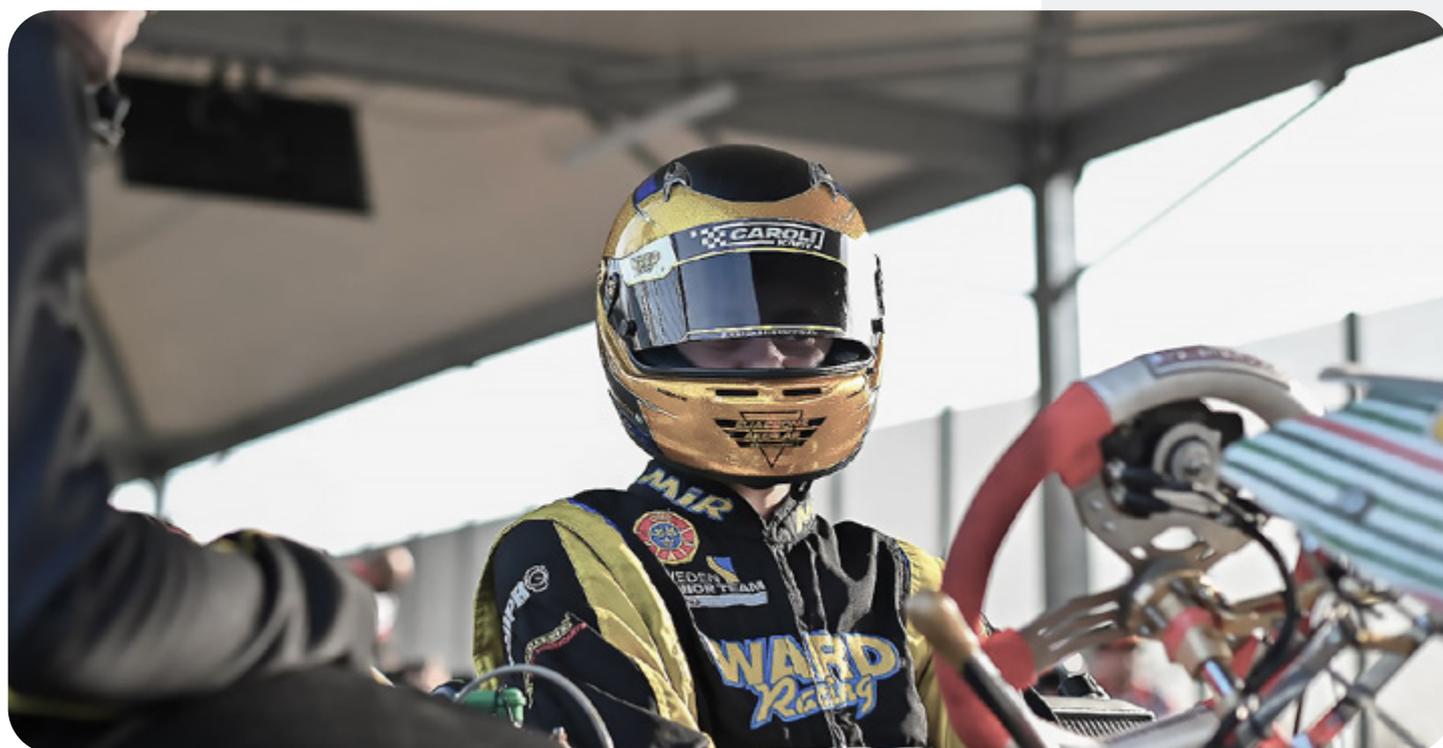

The oil in Grimsholm Premium Alkylate is fully synthetic and degradable and TC-W3 approved by NMMA (National Marine Manufacturers Association) with number RL 91506H and is therefore one of the few on the market that meets the requirements for e.g. API TC+, Husqvarna 266 and SS 15 54 61

Grimsholm produces more than 3 million liters per year delivered in time to more than 1000 retail stores and professional users. Home-improvement retail and specialty stores normally combine Grimsholm Premium Alkylate stand with Grimsholm accessory stand in the stores for optimal cross-selling effects. Simply, a perfect recipe for success!

Norton Andreasson

Swedish Champion in OK-kart

- 🟡 Open Cup Vice-Champion 2020

FUEL

ALKYLATE 2

- Low smoke version
- Meets European standards
- 100% synthetic TC-W3 oil additive

2-STROKE WITH LOW SMOKE EXPERIENCE

Grimsholm® Alkylate 2 is an environmentally adapted petrol for two-stroke engines.

It is mixed with 2% biodegradable two-stroke oil of synthetic esters with no ash additives. This improves lubrication and antioxidant properties and work for extended engine life.

Alkylate 2 is used to advantage in various power tools with two-stroke engines such as in chainsaws, trimmers, snowmobiles, mopeds, go-karts, boat engines etc.

The oil in Grimsholm® Alkylate 2 is TC-W3 approved by NMMA (National Marine Manufacturers Association) with number RL 91506H and do meet the requirements of API TC+, Husqvarna 266 as well as SS 155461.

ALKYLATE 4

- Optimized for maximum power
- Meets European standards
- Improved user environment

MAXIMUM POWER TO THE 4-STROKE NEEDS

Presenting a special developed alkylate fuel suitable for a wide range of 4-stroke appliances like lawnmowers, tractors, snow mobiles and go-carts.

The Alkylate 4 is as well as our other Alkylate products corresponding with European standards for Alkylate. We are proud of being able to lower the Olefines and other harmful substances in petrol close to zero.

The fuel have due to it's environmental properties taken large market shares in use at indoor gocart tracks in Scandinavia a well as it have been praised by the garden and forestry industry.

GUIDE BARS & SAW CHAINS

SAW CHAINS

Grimsholm® saw chains is the outcome of the combination of Swedish engineering, German steel, HQ grinding and a stretching process that makes the chains sharp and ready to use direct out of package with less need of time consuming manual stretching during use.

- During my 40 years as Development Director and Quality Manager for some of the world's leading manufacturers of cutting equipment, I learned how to combine the highest quality and functionality of saw chains and guide bars. Now, together with a specific and selected test group of professional users from the Swedish forest industry and Grimsholm's own development center, we have reached a completely new level that has not existed on the market before.

Dagbjørn Larsson, Product Specialist Forestry Accessories, Grimsholm Product AB

HARVESTER CHAINS

MAXIMIZED CHIP REMOVAL TECHNOLOGY

German steel, Swedish engineering and excellent cost effective production methods. This has shown to be the winning concept and have made huge difference for many European harvester owners. Grimsholm® developed unique grinding angles leads to extraordinary high flow chip removal in combination with optimal lubrication which gives high efficiency and a good operational economy.

"However, both are positively surprised by Grimsholm's factory grinding. **The Grimsholm saw chain factory sharpening beats most brands.** The Contribution to this is probably the grinding angles and also the slightly different design of the cutting teeth which is visible when the chain is inspected in detail."

- Tidningen SKOGEN, Issue No. 12, 2022, Review 22/12

Respect of trademark owner rights

Grimsholm® is a registered trademark within EU, China, and other applicable countries. Products wearing the Grimsholm® brand are often accessories compatible with machinery of other brands. Compatibility is communicated with the best of intentions to respect each trademark owner. All Grimsholm® labeled products are produced by Grimsholm Products AB and its partners without any cooperation with the trademark owner of the machine the accessory is compatible with.

As a distributor or retailer of Grimsholm® you are expected to respect the rights of each trademark owner and only use the Grimsholm® trademark as well as other trademarks mentioned in accordance with all applicable laws and regulations.

GRIMSHOLM EXTENDED WARRANTY

Our success is built on trust. It is important that both you as a reseller and the consumer can feel secure with the products that carry the Grimsholm® brand.

We therefore place a great deal of focus on the choice of materials and testing of our products, and this is reflected in our ability to guarantee their quality through a clear and generous warranty package which applies to you as a reseller.

1-YEAR WARRANTY

The products comply with all applicable EU directives and are manufactured in a production environment that has been certified as offering good working conditions for employees and high-quality production technology. If the product is an accessory or spare part for a machine, our ambition is for **the quality level to always be at least the same as the original part from the machine manufacturer.**

3-YEAR WARRANTY

The products comply with all applicable EU directives and are manufactured in a production environment that has been certified as offering good working conditions for employees and high-quality production technology. A product that achieves 3Y classification has undergone extensive testing and our ambition is for **it to stand out in terms of quality.**

10-YEAR WARRANTY

The products comply with all applicable EU directives and are manufactured in a production environment that has been certified as offering good working conditions for employees and high-quality production technology. The product is made of extra high-quality materials to guarantee an extremely high level of operating reliability, a long life and is specially produced for professional users. Our ambition is for a 10 Y product to be **the best available to buy on the market.**

WHEN THE WARRANTY APPLIES

THE WARRANTY IS VALID AS FOLLOWS:

- In the event of material and/or production defects on the Grimsholm® product, the Grimsholm® product is replaced.
- In the event of damage to the machine the Grimsholm® product is used on and the Grimsholm® product has caused the damage, the machine will be repaired or replaced.

EXCEPTIONS

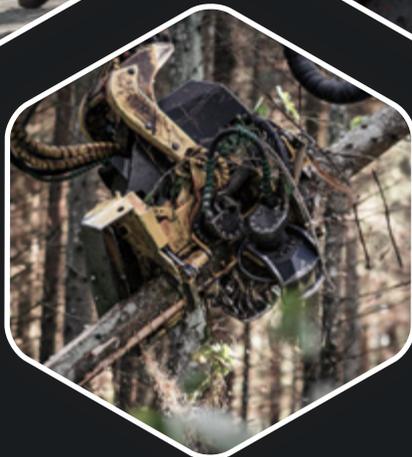

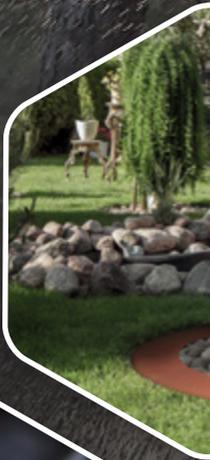

The special warranty does NOT apply in the following cases:

- With normal wear and tear (e.g. normal wear to blades and trimmer line)
- Failure to follow the user manual, installation, service and safety instructions or similar from the machine manufacturer and/or Grimsholm
- Incorrect installation or improper use
- If the damage is reimbursed by another warranty or insurance

Full warranty conditions can be found on www.grimsholm.com.
