

POWERBANK

4000mAh aluminum powerbank with battery indicator

Taking advantage of the newest battery technology, the compact and high-quality powerbank is designed for the SCANGRIP I-VIEW headlamp 03.5626 but can be used for recharging any SCANGRIP work light as well as other devices.

The powerbank is designed with a battery and charging indicator. It also features an intelligent load detection which means it automatically turns power on/off when load is connected/removed.

The modern and lightweight design makes the powerbank easy and convenient to take with you everywhere you go. The housing is made of anodised aluminium for high durability which means it can withstand the demanding work environment of the workshop, van or building site.

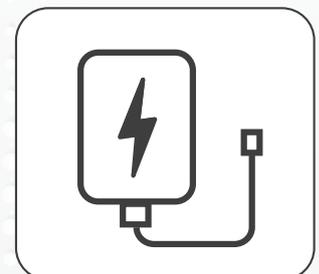

To increase the operating time of the I-VIEW headlamp, simply attach the powerbank to the flexible clip holder on the head band and connect the cable to the headlamp.

- Powerbank designed for SCANGRIP I-VIEW headlamp
- Use to recharge any SCANGRIP work light as well as other devices
- Battery and charging indicator
- Intelligent load detection
- Sturdy and made for work
- Slim, compact design
