

SCANGRIP TRIPOD

For stationary positioning of work lights

SCANGRIP TRIPOD is indispensable for stationary positioning of the work light for illumination in a specific working area.

The SCANGRIP TRIPOD is extendable from only 1.35 m up to 3 m, which gives you complete flexibility to position the light in the requested height. When mounted on the tripod the light can be tilted to provide the optimum beam angle.

The stable construction of the SCANGRIP TRIPOD makes it safe even when fully extended. It is supplied with anchor points that provide an opportunity for extra stability if the tripod is exposed to strong wind or standing on an uneven surface. To increase safety when in use, the cable of the lamp can be fixed in the safety clips placed on each separate leg.

Dual bracket (03.5308) for positioning of two lamps available.

TECHNICAL SPECIFICATIONS

6 kg

Max load 10 kg

Welded steel mounting cap 10 mm thread

Powder coated steel

360° locking system for a firm grip
