

## SAFE INSTALLATION

### WARNING:

För ditt skydd och din säkerhet ska du noggrant läsa igenom och förstå informationen i den här handboken innan du försöker montera, installera eller använda produkten.

1. Se till att drivdonets spänning endast är 12V DC
2. Ta aldrig isär eller reparera boxen under några omständigheter
3. Om ljuskällan inte används under en längre tid, koppla från strömförsörjningen
4. Överbelasta inte boxen, annars kan det orsaka elektriska stötar eller brand

### WARNING:

For your protection and safety, carefully read and understand the information provided in this manual completely before attempting to assemble, install or operate this product.

1. Make sure the power supply is DC 12V only
2. Don't ever disassemble or repair under any circumstances
3. When the light source is not used for a long time, please disconnect the power supply
4. Do not overload the circuit, otherwise, it may cause electric shock or fire

### ADVARSEL:

Av hensyn til din egen sikkerhet bør du lese og gjøre deg innforstått med hele denne bruksanvisningen før du begynner å sette sammen, montere eller bruke dette produktet.

1. Kontroller at strømforsyningen bare er DC 12V
2. Ikke demonter eller reparer under noen omstendigheter
3. Når lyskilden ikke brukes på lenge, må du koble fra strømforsyningen
4. Ikke overbelast dimmerboksen, ellers kan det forårsake elektrisk støt eller brann

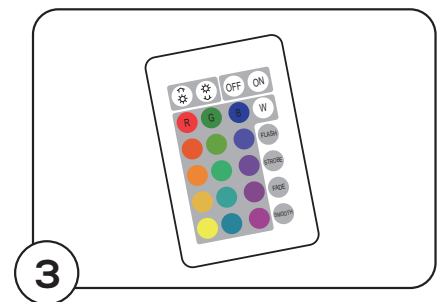

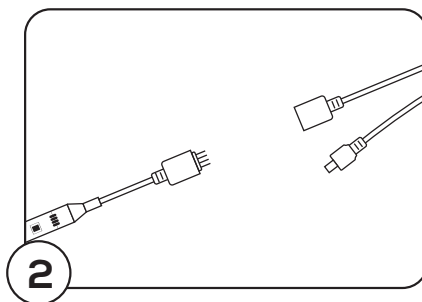

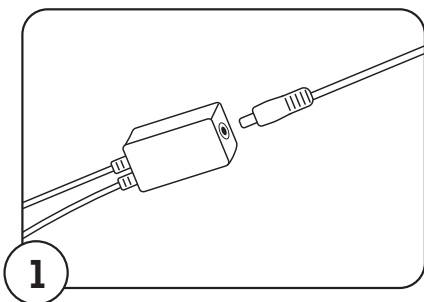

## ADVARSEL:

Af hensyn til din beskyttelse og sikkerhed skal du læse manualen omhyggeligt og forstå informationerne inden du forsøger at samle, installere eller betjene dette produkt.

1. Sørg for, at strømforsyningen kun er DC 12V
2. Skil aldrig under nogen omstændigheder adskille eller reparere
3. Hvis lyskilden ikke bruges i længere tid, skal du afbryde strømforsyningen
4. Overbelast ikke dæmperboksen, da det kan forårsage elektrisk stød eller brand

---

## Installation:

## Warning

1. Make sure the power supply is DC 12V only;
2. Don't ever disassemble or repair under any circumstances;
3. When the lamp is not used for a long time, please disconnect the power supply;
4. Do not overload the circuit, otherwise it may cause electric shock or fire.

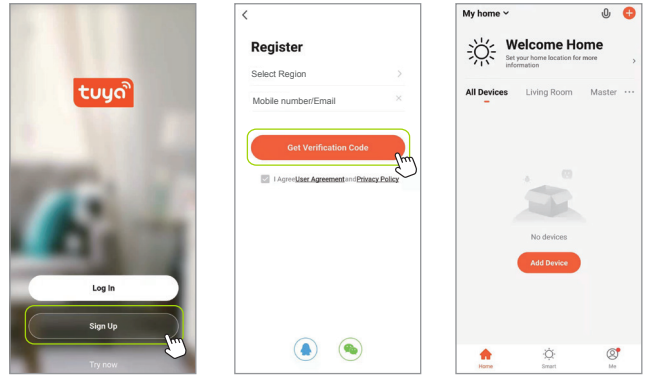

## 1. Download app and Register account

- a. You can download the App by searching Tuya Smart in mobile app stores or scanning the following QR code.

1

- b. Open the APP, click "Sign Up" and create your account according to the prompt.

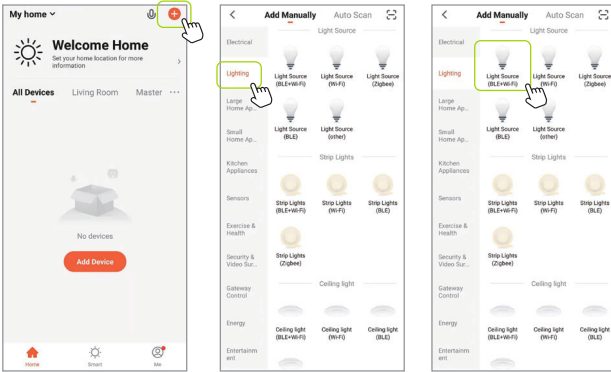

## 2. Fixture Connection

### Note:

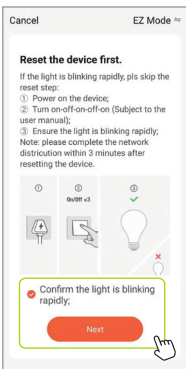

- a. Make sure the fixtures are blinking after power on, either fast or slow, if not, power ON/OFF the Smart box by 3 times till you see the blink.
- b. If EZ mode is not working, change to AP mode (some routers don't support EZ mode).

2

## EZ Mode (Easy-Connect Mode)

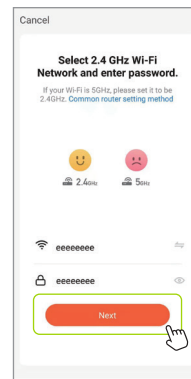

Click "+" at the home page → "Lighting" → "Lighting Source (BLE+Wi-Fi)"

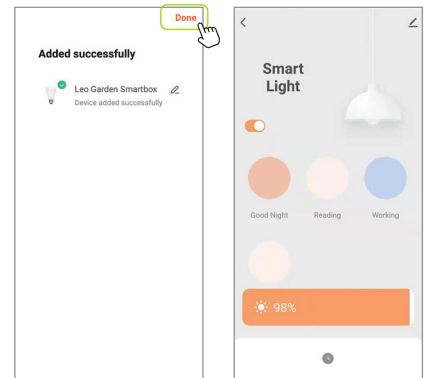

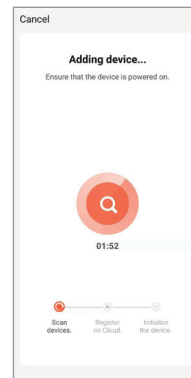

If you could see the rapid blinks from the connected fixtures, click "Confirm the light is blinking rapidly" → "Next"; If not, reset by turning Off/On by 3 times till it appears.

3

Enter your WI-FI and password, click "Next".

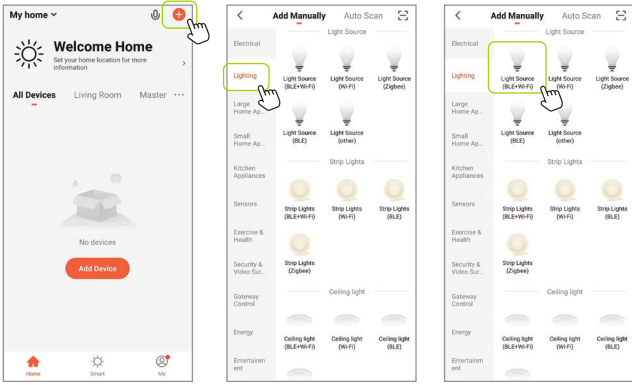

**Note:** Only 2.4 GHz network are supported.

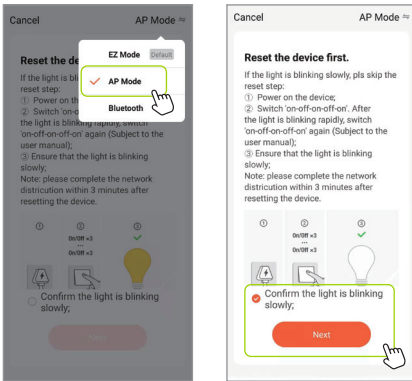

Click "Done" after the connecting process is completed, now the fixtures are added successfully.

4

## AP Mode (Access Point Mode)

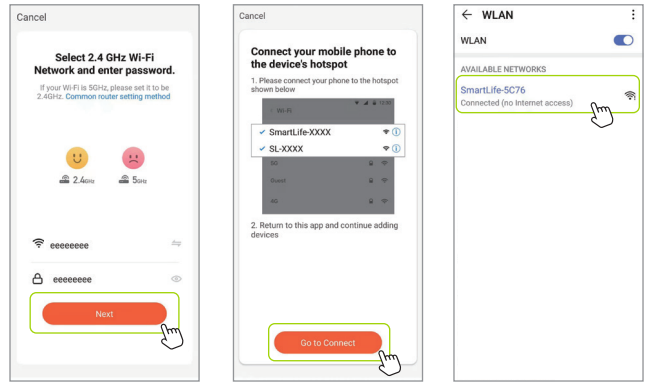

Click "+" at the home page → "Lighting" → "Lighting Source (BLE+Wi-Fi)"

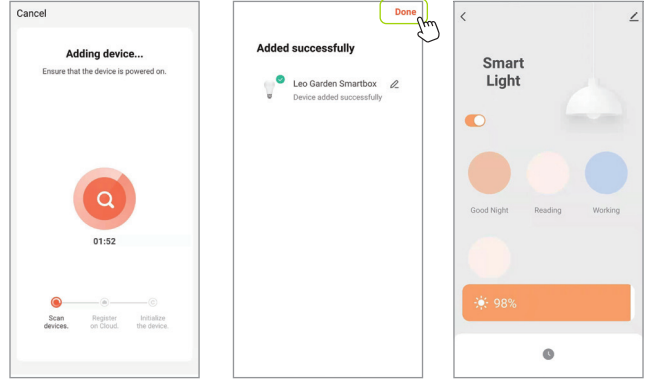

Click "AP Mode" → "Confirm the light is blinking slowly" → "Next".  
If you see the rapid blinking instead of slow ones, reset to AP mode by turning OFF/ON 3 times.

5

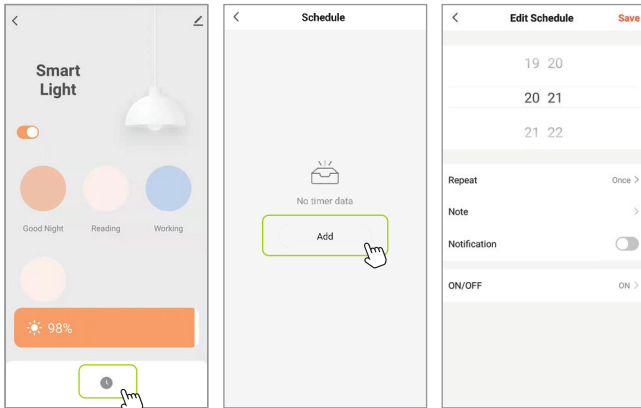

Enter your WI-FI name and password, click "Next", you'll see the hotspot named "Smartlife-XXX" generated from the Smart box, click "Go to Connect".  
**Note:** Only 2.4 GHz network are supported.

Go back to TUYA app, click "Done" after the connection process is completed.

6

## 3. Edit Timer

Click on the Clock icon after the fixtures are added successfully, then you can add your schedule to decide when to turn ON/OFF of your fixtures.

7
