

# Lock-Chain Combination Granit CityChain X-Plus 1060

Art. no. 28678

Page 1 of 1

## Technology

- 10 mm strong chain with fabric sleeve to prevent damage to the motorbike's paintwork
- ABUS Power Link Technology (patented) offers a direct and covered locking of the chain into the locking mechanism
- Interlocked lock body cover to protect against brutal opening methods
- The chain, the lock body as well as supporting elements of the locking mechanism are made of special hardened steel
- ABUS X-Plus cylinder for highest protection against manipulations e.g. picking
- Two keys are supplied with the lock, one LED torch key
- Automatic keyhole cover against dirt and corrosion
- ABUS Code Card for additional or replacement key

## Operation and use

- Good protection at high theft risk
- Recommended for securing entry level motorbikes, light motorbikes and scooters
- The longer the chain, the easier the motorbike can be locked to a fixed object

## Tips

- This lock can be ordered keyed alike to other locks. This means several locks would match one key, respectively key code
- Chain lock combinations are a very good solution for locking a motorbike to a fixed object
- Very handy use because only one end of the chain must be locked
- To limit the possibilities of brutal attacks it is recommendable to avoid that the chain lays on or hangs close to the ground
