www.plus.dk

DK

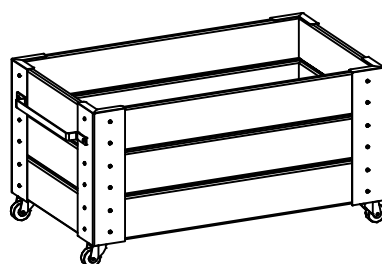

Vi anbefaler der bruges en maxikap /kapilær kasse
- købes særskilt i byggemarkedet eller trælast

18239-15

DE

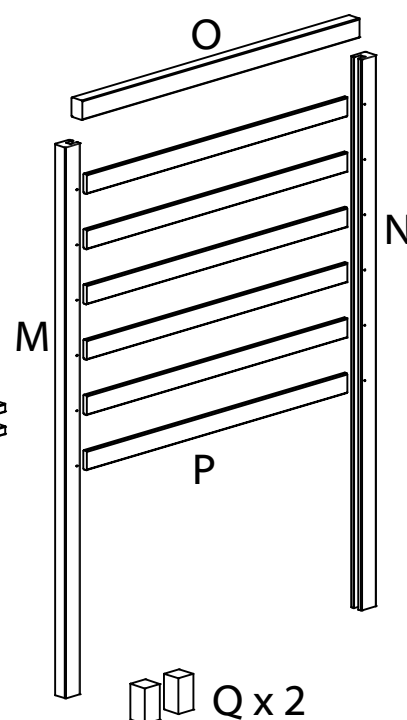

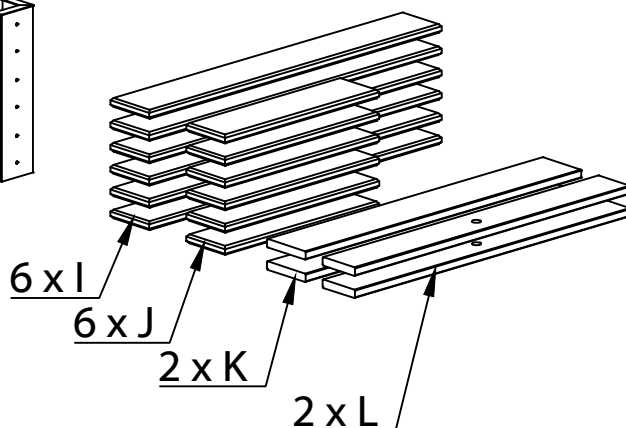

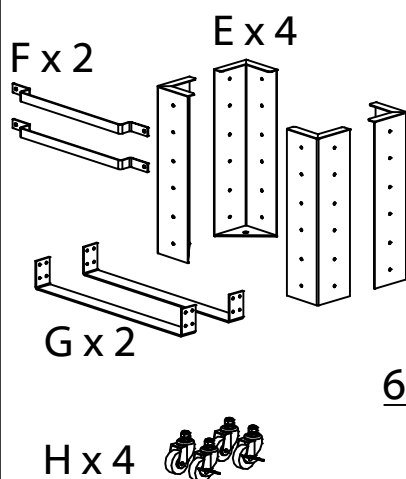

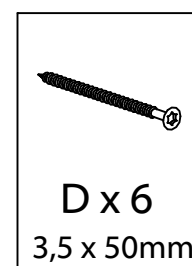

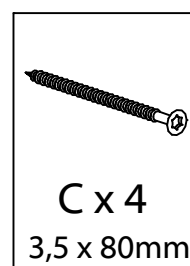

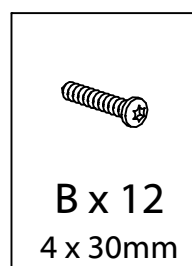

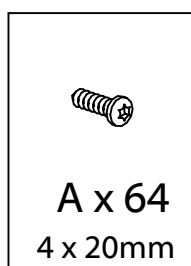

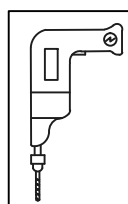

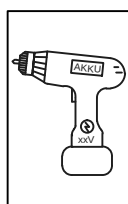

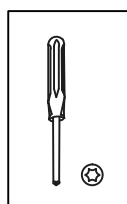

Wir empfehlen die Verwendung eines Kapillarbewässerungskastens
- dieser ist separat im Fachhandel zu erwerben.

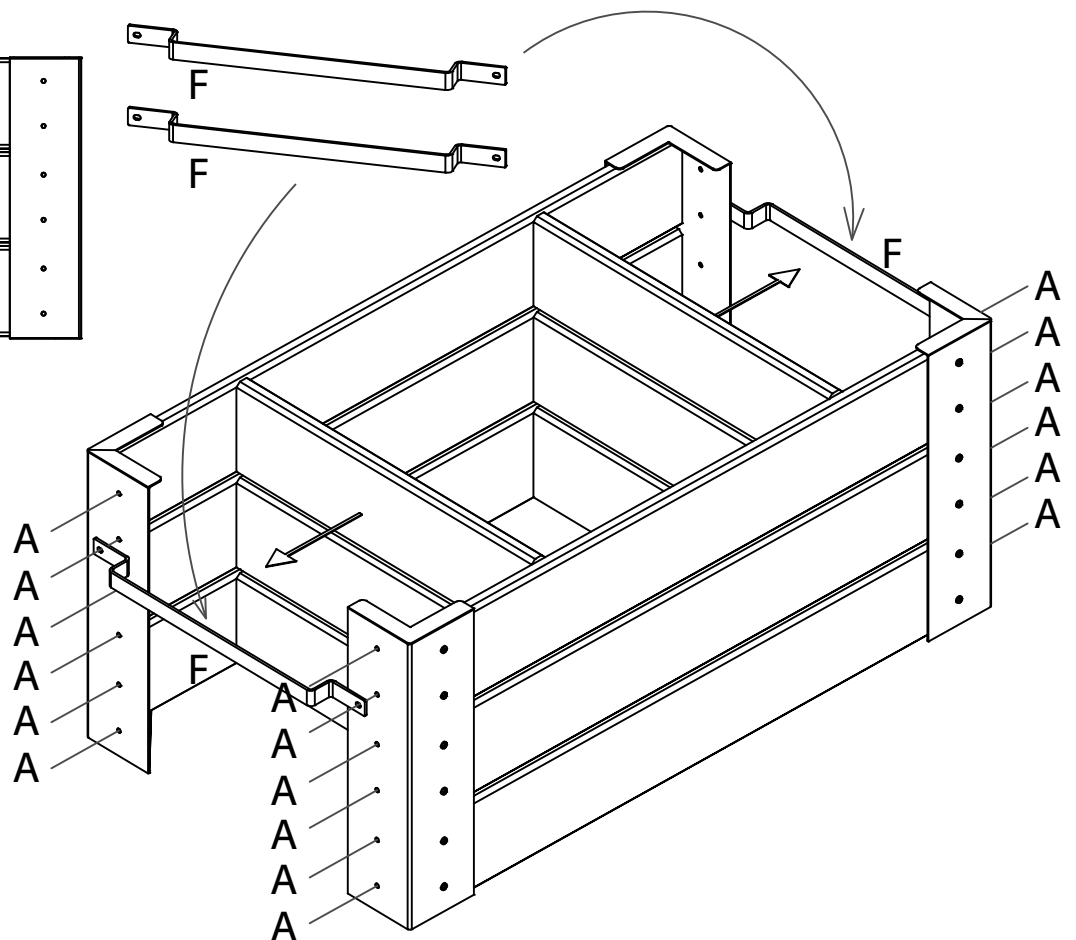

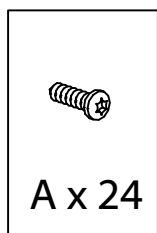

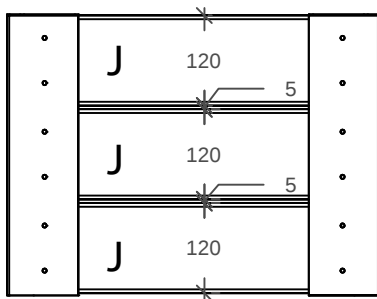

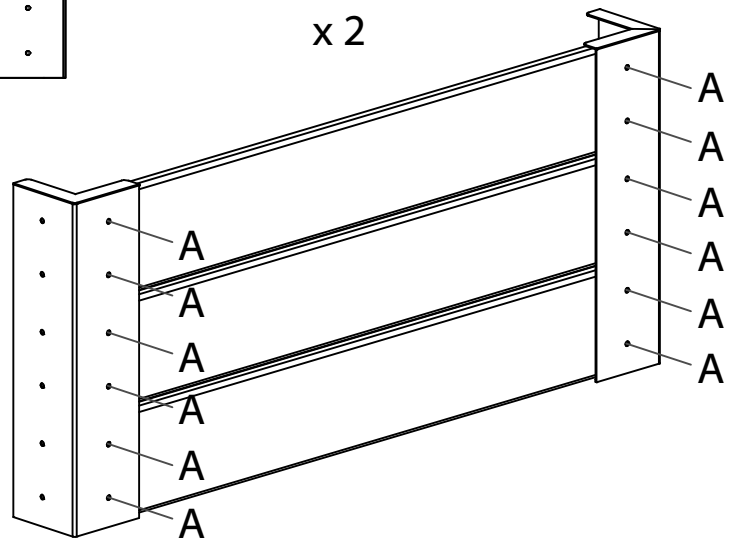

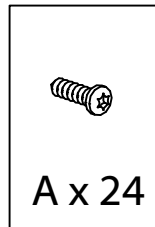

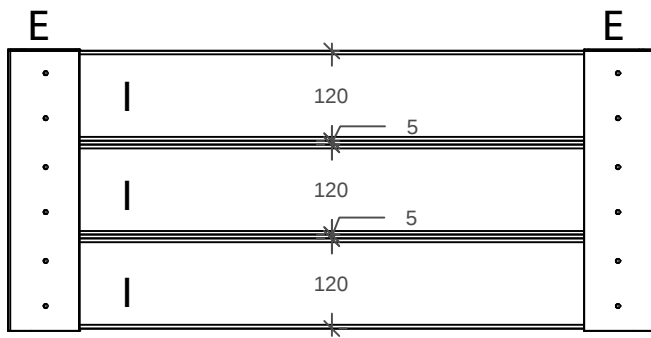

18238-15

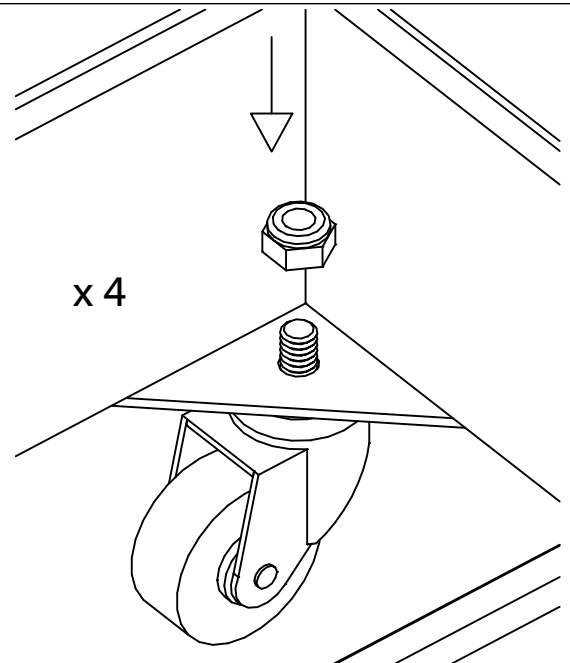

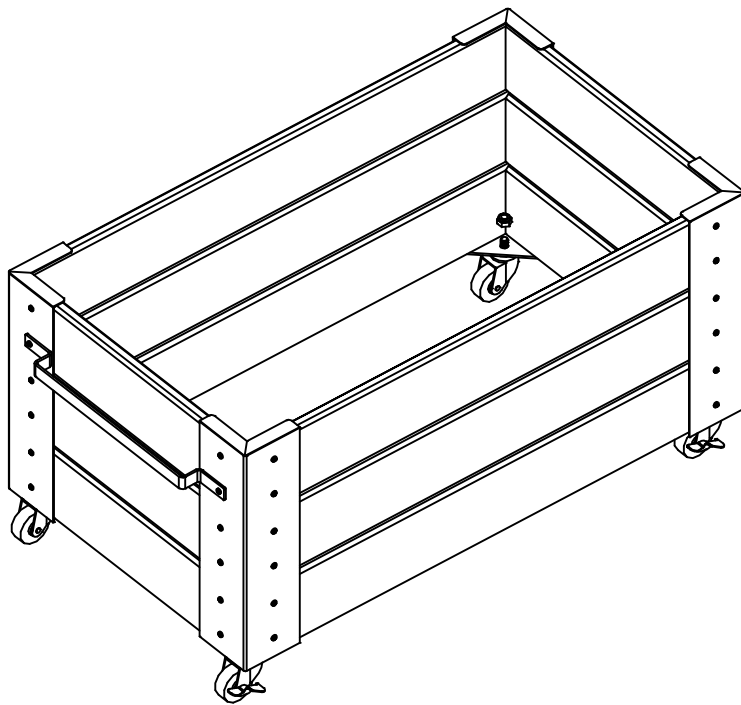

UK

We recommend using a maxikap/Capillary box
- purchased separately in the DIY store

DK

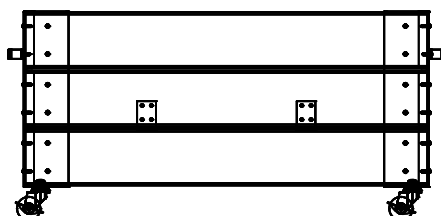

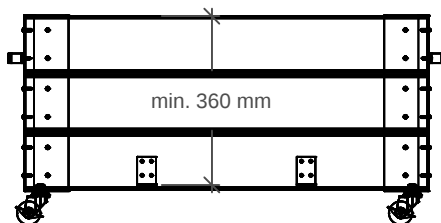

Stål bundlister kan placeres i den højde man ønsker. Alt efter om der skal en maxikap-/kapilær kasse i, eller der plantes direkte i jord/muld. Fiberdug anvendes altid. (fiberdug prikkes, så overskydende vand kan løbe ud).

DE

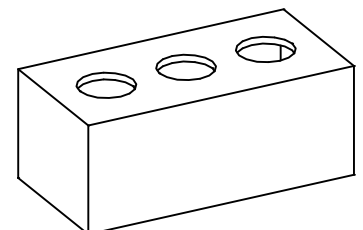

Die Halterungen für den Stahlboden können auf die gewünschte Höhe eingestellt werden, je nach Verwendung eines Bewässerungskastens oder dem direkten Gebrauch von Erde. Die Verwendung eines Fibertuches ist immer erforderlich. Das Fibertuch an einigen Stellen durchstechen, damit überschussiges Wasser ablaufen kann.

UK

Steel bottom lists can be placed at the height you desire, depending on maxikap/capillary box or planting directly in soil/composting. Always use Fiber tex cloth. (The Fiber tex cloth is pierced so excessive water runs out.)
