# “Renewing Joints” Kit, 4 Pcs.

wolfcraft®

For **scraping out old** silicone and acrylic joints and **smoothing new ones**

This 4-piece kit makes it **easy to renew silicone and acrylic joints**. Use the **joint scraper**, which is made of sturdy, fibreglass-reinforced plastic (GFRP), to remove silicone or acrylic fillers from the joints to be renovated, without leaving residues behind. Once you have filled the joint with silicone or acrylic, switch to the **joint smoother**.

## 1 joint scraper

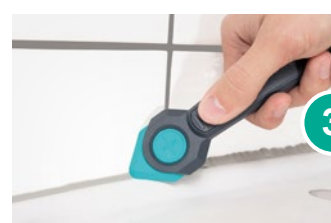

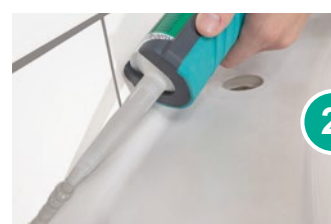

- made of sturdy, fibreglass-reinforced plastic (GFRP), for **durability** and easy cleaning
- centre spike for easily **scraping out** the joint
- rectangular geometry for **safely guiding** the tool in the joint
- 2 chamfered edges makes it easy to **thoroughly remove** silicone and acrylic from tiles and ceramics along the sides
- ergonomic handle for **comfortable handling** and fatigue-free working

## 2 joint smoothers

- 1 joint smoother with **45° edge profile**, dual-sided: width 5 and 10 mm
- 1 joint smoother with **round profile**, dual-sided: radius 6 and 8 mm
- made of low-maintenance silicone for **easy cleaning**
- can be used **flexibly** with and without holder as needed

## 1 holder for the joint smoother

- made of sturdy GFRP for a **long life and easy cleaning**
- ergonomic handle for comfortable handling and **fatigue-free working**
- holder for the joint smoother for **quick exchange of the smoothers and secure fit**
