

Enders®

Spark a new  
flame.

Enders Nova LED terrace burner.

Fire up the  
night.

With the NOVA LED terrace burner, a lovely evening can be transformed into an atmospheric night. The flickering flames are surrounded by red LED light and indirect lighting creates a shimmering effect in the column base.

But it is not just the light that creates the perfect atmosphere, the Nova device itself is impressive too. It looks great thanks to the slim housing in black, brown, grey or taupe, for example, as well as the glass cylinders and reflectors which have been designed in exactly the right colour shade.

And however your night ends, NOVA is so compact that you can set it up virtually anywhere.
